

TIPS FOR KIDS

FreeStyle
Libre 2

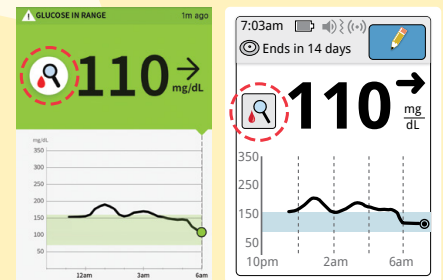

Remember these important things:

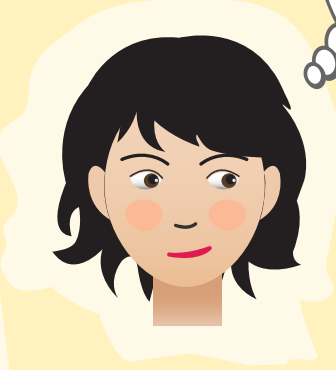

The Sensor has to go on the back of my upper arm.

I must do a blood glucose test with my meter when I see  during the first 12 hours of wearing a Sensor.

I must do a blood glucose test with my meter if I think the number doesn't match how I feel.

If I take insulin for a meal, I should not take any more insulin for 2 hours. I need to wait and watch.

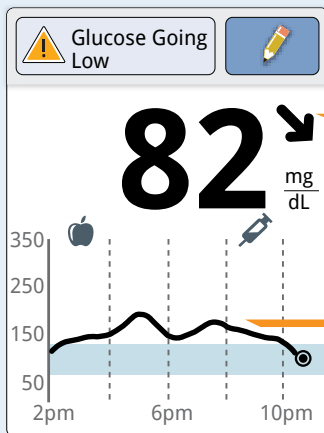

2 HOURS

Warning

The App should only be used to scan your Sensor. If the App is used to scan another person's Sensor, glucose data may get confused.

Important!

Do not take more than 500 mg of Vitamin C supplements per day. This may affect your Sensor readings. Some supplements like Airborne® and Emergen-C® contain more than 500 mg of Vitamin C.
