Remember these important things:

The Sensor has to go on the back of my upper arm.

I must do a blood glucose test with my meter if I think the number doesn’t match how I feel.

If I take insulin for a meal, I should not take any more insulin for 2 hours. I need to wait and watch.

I must do a blood glucose test with my meter when I see during the first 12 hours of wearing a Sensor.
Warning!
The App should only be used to scan your Sensor. If the App is used to scan another person's Sensor, glucose data may get confused.

Important!
- While using a FreeStyle Libre 2 Sensor, do not take more than 500 mg of Vitamin C per day.
- While using a FreeStyle Libre 2 Plus Sensor, do not take more than 1000 mg of Vitamin C per day.
- Taking more than these levels may affect your Sensor readings. Some supplements like Airborne® and Emergen-C® contain 1000 mg of Vitamin C.
