**TIPS FOR KIDS**

Remember these important things:

1. **The Sensor has to go on the back of my upper arm.**

2. **I must do a blood glucose test with my meter when I see** 110 mg/dL **during the first 12 hours of wearing a Sensor.**

3. **I must do a blood glucose test with my meter if I think the number doesn’t match how I feel.**

4. **If I take insulin for a meal, I should not take any more insulin for 2 hours. I need to wait and watch.**

---

**Tips FOR KIDS**

- Remember these important things.
- The Sensor has to go on the back of my upper arm.
- I must do a blood glucose test with my meter when I see 110 mg/dL during the first 12 hours of wearing a Sensor.
- I must do a blood glucose test with my meter if I think the number doesn’t match how I feel.
- If I take insulin for a meal, I should not take any more insulin for 2 hours. I need to wait and watch.
**Warning**

The App should only be used to get glucose data from your Sensor. If the App is used to get glucose data from another person's Sensor, glucose data may get confused.

**Important!**

Do not take more than 500 mg of Vitamin C supplements per day. This may affect your Sensor readings. Some supplements like Airborne® and Emergen-C® contain more than 500 mg of Vitamin C.
